PROFESSIONAL SUMMARY

Graphic designer with 6 years of experience across different roles in branding and digital communication. I started as an agency designer, producing visual content for multiple national accounts, then stepped up to Junior Art Director, helping create social media campaigns focused on brand consistency. As a freelancer, I built brand identities from scratch, developing complete visual universes —from naming to packaging— for a range of clients. Most recently, I led a design team at eJam, producing high-volume content for consumer brands across DTC and paid social campaigns, integrating generative AI tools into the creative process. I am looking to bring that well-rounded perspective —agency, art direction and brand building— to a high-impact design role.

PROFESSIONAL EXPERIENCE

eJam

Graphic Design Team Lead | *February 2026 – September 2026*

- Across my full tenure at eJam, designed 4,400+ assets tied to $2.9M in revenue (Meta) for performance campaigns on Meta and DTC channels (including NovaMD, Hydronova, Bug MD and Shameless Snacks).
- Directed the image generation process for Shameless Snacks, from creation through approval for use in paid media, retail and marketplace.
- Led a team of 3 designers (graphic and motion), sustaining an output of 200+ pieces per month for DTC and paid social campaigns.
- Built a custom React-based prompt generation tool to streamline my own AI workflow.
- Built a spell-checker to speed up the quality control process for creative assets.
- Explored new angles to reach audiences we were not capturing, and set up tasks to develop those ideas with the team.

Graphic Designer | *October 2024 – February 2026*

- Worked across multiple creative territories: lifestyle UGC, direct-response formats, nutritional highlight ads and comparison infographics.
- Contributed to product launches and asset production for marketplace and retail channels.
- Used generative AI tools and prompt engineering to accelerate image and video asset production within brand guidelines.
- Animated winning assets with AI to create new video iterations from static pieces that had already proven strong performance.

Freelance

Designer & Art Director | *April 2023 – October 2024*

- Developed complete branding and visual identity for 4 clients — Cultus Coffee, Puzzle Peacing, Smart Studio and Fuego Azul — from naming and logo systems to packaging and social media applications.
- Led visual and creative direction for Living Clothing, an Argentine apparel brand, producing content and campaigns for its digital channels.
- Created content and planned social media grids for accounts such as Skay Gym (gym chain) and Kaitazoff Motors.
- Defined visual universes alongside clients, from initial concept to full identity delivery.

Coupe

Junior Art Director | *September 2022 – April 2023*

- Was part of the brand relaunch team for Usual and Cintas Python.
- Led a 2-person team on B2B and B2C campaigns for national brands, including Cintas Python and Electra Aires Acondicionados.
- Worked on the out-of-home campaign for Electra Aires Acondicionados.
- Designed and managed the social media identity of national brands, ensuring visual consistency across accounts and formats.

Graphic Designer | *April 2020 – September 2022*

- Produced out-of-home, subway and digital billboard pieces on Avenida 9 de Julio for Sancor Salud, including campaigns featuring the Argentine national hockey teams Las Leonas and Los Leones.
- Worked on print media for Sancor Salud campaigns, including out-of-home and magazine placements, preparing print-ready files for production.
- Worked with 4 agency clients — Banco Piano, Cintas Python, Galileo and Fundación Sancor Salud — also pitching content ideas, not just executing.
- Designed pieces aligned with business goals, meeting quality standards and deadlines.

EDUCATION

Visual Design and Communication — Universidad Nacional de La Plata, School of Fine Arts
April 2019 – December 2024 | Degree completed

ADDITIONAL TRAINING

UX/UI — Domestika, 2024
